

Fully Automatic

Phono Preamp

Pick it MM E

A1.2

Fully automatic turntable

MSRP 499 € (incl. VAT)

Colour:

- **NEW** aluminium die-cast platter
- **NEW** updated drive system
- Pre-adjusted Pick it MM E cartridge
- Built in, switchable phono preamp
- 8,3" black-aluminium ultra-light-mass tonearm
- Precise mechanics with automated start and stop
- Carbon fibre reinforced anti-magnetic headshell
- Resonance damped wooden chassis
- Silicon damped feet
- Electronically controlled playback speeds
- Premium semi-symmetrical Connect it E phono cable
- Gold plated RCA cable connectors
- Dust cover included
- Available in black and white
- Handmade in Europe

Speed: 33, 45 (electronic speed change)

Drive principle: belt drive, fully automatic

Platter: die-cast aluminium platter

Wow & flutter: 33: +/-0,27%; 45: +/-0,25%

Speed drift: 33: +/-0,75%; 45: +/-0,65%

Signal to noise: 65dB

Tonearm: ultra-light-mass 8,3" aluminium tonearm

Effective arm length: 211mm

Overhang: 19,5mm

Included accessories: 15V DC / 0,8A power supply, dust cover, 7'' single adapter, feltmat, phono cable

Power consumption: 1,5W

Dimensions: 430 x 130 x 365 mm (WxHxD)

Weight: 5,6 kg net

The next chapter

We have always had one purpose since our establishment in 1991: bring HiFi Stereo music enjoyment to as many people as possible. With the A1 we added a completely new range to our portfolio: The AUTOMAT line. The technology allowed us to make automatic turntables without degrading the sound quality & make listening to vinyl easier than ever.

The automatic drive is still handmade in Germany by a traditional manufacture with a wealth of experience in making automatic turntables. The assembly is done in the Czech Republic by technicians with decade long experience. This technically reliable technology is what enables us to bring the Pro-Ject sound and philosophy to an entirely new audience, and, with it, affordable and accessible high-quality HiFi to people's homes.

Due to the big success of the A1 we want to go even further and updated the drive system and platter.

Please welcome the new **A1.2**

AUTOMAT Technology

The fully mechanical automatics are engaged when you press start and the tonearm is automatically moved to the lead in groove of the record. Once playing, the automatics are completely taken out of the equation. And because the automatics are working entirely mechanically – no additional electronics needed – they are truly not influencing or degrading sound quality during playback!

Heavy wooden chassis

The wooden chassis avoids hollow spaces wherever possible. As a result, the chassis' heavy mass reduces unwanted resonances to a minimum and decouples the A1.2 from outside influences.

Silicon damped feet

The feet effectively decouple the turntable from the surface it is placed on using an internal silicon damping layer. This is an essential feature for every good turntable as it acts as yet another mechanism to ensure your vinyl playback is not influenced by outside interference and resonances.

Ultra-light-mass aluminium tonearm

The A1 features an 8.3" ultra-light-mass aluminium tonearm. Together with the Pick it MM E we get extraordinary fast response and detail in terms of transients and microdynamics. Tracking force and anti-skating are factory pre-adjusted which make the A1.2 plug & play ready within a few seconds.

Carbon fibre reinforced headshell

The headshell is a completely new design especially for the A1.2. It is made of carbon fibre reinforced polymer which makes it super stable and rigid, all while keeping the weight at a lowest. The polymer/carbon composite material results in excellent internal damping of resonances.

New die-cast aluminium platter

We removed the stamped aluminium platter of the A1 and updated it with a new designed die-casted one. To guarantee a perfect playback the platter is additionally CNC machined.

Perfect speed, phono-preamp, cable

In typical Pro-Ject fashion, the motor is electronically controlled. Easily switch between 33 & 45 RPM with the push of a button. The built-in switchable phono preamp makes the A1.2 incredibly versatile & allows you to connect it directly to any line input or use a phono-preamp. The A1 comes with our Connect it E phono cable. It is a semi-balanced, low-capacitance cable, with superior shielding.
